

Documentation for creating my tenant - Entra ID environment

Sign up

- Signing up with 90 day trial, created an available domain: markassociation.onmicrosoft.com
- Setup MFA with the Microsoft Authenticator app
- Signed into the admin.cloud.microsoft homepage

Microsoft Intune

- Intune is a device management system and automatically syncs with Entra ID
- Hypothetically, I can have Windows VMs acting as user devices
- These VMs can be synced in Intune

Onboarding workflow

1. Manager submits new hire onboarding request
2. HR confirms hire
3. IAM/IT Provisions account
4. Groups and permissions are assigned
5. User receives credentials
6. User enrolls into MFA on first login

Badges

- Badge system receives employee information
- Badge Printed - provided by managers
- Employee gains building access

Automated Onboarding Process

- HR enters employee into Workday (HR system)
- Account is automatically created in Active Directory/Entra ID (Identity Platforms)
- Email created
- Groups & Licenses assigned based on department
- Welcome email along with instructions is sent

Transfer workflow

1. User moved from Players to Coaches
2. Remove Players group
3. Add Coaches group
4. Verify Access

Badges

- Badge system employee information is updated
- Employee access is transferred

Automated Transfer process

- HR updates user's account
- Automation moves user to proper department with proper permissions

Offboarding Workflow

1. User traded/released
2. Disable account
3. Revoke sessions
4. Remove groups
5. Archive mailbox
6. Delete account after retention period (30 days - Manager review for data recovery is needed, 90 Days - Account is deleted if no business requirement exists)

Badges

- Disabled badge
- Remove building access
- Collect badge

Automated Offboarding process

- HR updates user's account
- Automation disabled user's account, revoked sessions, mailbox delegated, groups removed, retention timer starts

Creating Organizational Units & Security Groups

These will be the Organization Units (OUs) / security groups users will be placed in. **For this specific project I will just implement Core & Resource groups.** Intune does not have OUs like Active Directory, the solely work off of security groups

OUs

Players, Coaches, HR, Department, Finance, IT, Medical

Core Department Security Groups

- OKC-Players
- OKC-Coaches
- OKC-HR
- OKC-Finance
- OKC-IT
- OKC-Medical
- OKC-Scouts

Business/Operational Security Groups (Not Implementing)

- OKC-Marketing
- OKC-Operations
- OKC-Game-Day-Staff
- OKC-Media
- OKC-Staff

Resource Security Groups

- Playbook-View
- Playbook-Editors
- Finance-Reports
- HR-Management
- Media-Assets
- Medical-Assets
- Travel-Coordination

Security Group Permissions

Group	Resource Access
OKC-Players	Playbook-View, Trave-Coordination
OKC-Coaches	Playbook-View, Playbook-Editors, Travel-Coordination
OKC-HR	HR-Management
OKC-Finance	Finance-Reports
OKC-IT	All resource groups
OKC-Medical	Media-Assets
OKC-Scouts	Playbook-View, Travel-Coordination

Playbook-View : Grants read-only access to team playbooks and approved strategy documentation.

Playbook-Editors : Grants edit and management permissions for team playbooks and coaching materials.

Finance-Reports : Provides access to financial reports, budgeting documents, and accounting resources.

HR-Management : Provides access to employee records, onboarding resources, and HR management documentation.

Media-Assets : Grants access to approved media files, marketing content, and digital assets.

Medical-Assets : Provides access to medical records, treatment documentation, and healthcare resources.

Travel-Coordination : Grants access to team travel schedules, lodging information, and transportation resources.

Role-Based Access Control

- By adding each user to their necessary department security group we are implementing Role-Based Access Control (RBAC). Meaning the user's access will be determined by the groups/roles they are assigned to

Manual User Provision Process

New User Creation

- Create Entra ID account
- Configure user attributes
- Assign temporary password (user will change upon login)
- Assign department groups
- Assign licenses
- Require MFA registration
- Verify access

Account Modification

- Update user attributes
- Adjust group memberships
- Validate permissions

Account Deprovisioning

- Disable account
- Revoke active sessions
- Remove groups
- Remove privileged roles
- Archive mailbox
- Schedule deletion

Actual Creation

- Entra ID allows me to individually create users or import a CSV file with a list of users.
- I can enter their firstname, lastname, username, domain, display name
- I can also automatically create a password and require the user to change their password when they first sign
- Product License: Selecting Microsoft Intune Suite license (250 available) allows the user to have access to Microsoft 365
- Optional Settings: I can pick for a user to have admin center access or not (I would really only pick this option for specific IT groups)
- Admin Center Access: Shows options for Helpdesk Admin, User Admin, AI Admin, etc. all these different roles have different permissions
- Profile Info - I can enter profile info like job titles, phone number, department, address, etc

Once a user is created

- User is added to active user's
- User details show: Name, Username, Temporary password, licenses
- I can also save user settings as a template

When implementing the account information I continuously received errors. It is important to make sure none of the “Username” section repeats, also I was required to add the domain (@markassociation.onmicrosoft.com) in the username section.

Learn how to add multiple users

Microsoft 365

Add multiple users

After adding user’s via CSV file I make sure to add the proper license to their accounts, next I can simply add my desired user’s.

Here’s a look at how role assignments can be administered in Intune. Solomon, Mark, and Lily are set as both Helpdesk and Admin users.

MFA Policy

- All users are required to register MFA during first login
- Instructions will be emailed to user, they can call the IT Help Desk for further assistance
- Microsoft Authenticator is preferred authentication method

Benefits of MFA

- Supports Zero Trust Policy - The act of never trusting always verify.
- Reducet account takeover
- Protects against password compromise

Self Service Password Resets (SSPR)

- User’s will have the option to reset their password via computer screen
- User’s can reset their password at MBaresets.com if needed

Group Policy Objects (GPOs)

GPO Overview		
GPO Name	Purpose	Target OU
Password Policy	Enforce strong passwords	All Users

Screen Lock Policy	Protect unattended devices	All Users
Windows Update Policy	Maintain patch compliance	All Devices
USB Restriction Policy	Prevent unauthorized storage usage	HR, Finance, Medical
Microsoft Defender Policy	Endpoint protection	All Devices
BitLocker Policy	Encrypt company devices	Finance, HR, IT, Medical
Administrative Access Policy	Restrict local admin rights	All Non-IT Users
Drive Mapping Policy	Map department resources	Department OUs

Password Policy

Purpose: Enforce strong password requirements for all users.

- Minimum 12-character password
- Password complexity enabled
- Password expires every 90 days
- Account lockout after 5 failed login attempts (Forced to contact help desk)

Security Lock Policy

Purpose: Protect devices when left unattended

- Screen locks after 15 minutes of inactivity
- Password required upon unlock
- Applied to all employees

Windows Update Policy

Purpose: Ensure systems remain secure and patched

- Automatic Windows Updates enabled
- Critical security updates installed automatically
- Schedules installation outside business hours
- Applied to all company devices

USB Device Restrictitons

Purpose: Prevent unauthorized data transfers

- Block unauthorized removable storage devices
- Allow approved encrypted company devices only

- Applied To: Financial, HR, Medical

Microsoft Defender Policy

Purpose: Protects endpoints from malware and threats.

- Real-time protection enabled
- Cloud-delivered protection enabled
- Daily quick scans
- Weekly full scans
- Applied to all company devices

Drive Encryption Policy

Purpose: Protect sensitive data on laptops and desktops

- Bitlocker encryption required
- Recovery key stored securely
- Applied to: Finance, HR, IT, Medical

Administrative Access Policy

Purpose: Limit local administrator privilege

- Standard users cannot install software
- Local Admin accounts are restricted
- Administrative tasks require approved IT accounts
- Applied to: Non-IT users

Network Drive Mapping Policy

Purpose: Automatically provide access to department resources

- P:\ Playbooks (Players/Coaches)
- T:\ Travel Information (Players/Coaches/Scouts)
- H:\ EmployeeRecords (HR)
- F:\ Financial Reports (Finance)
